

DRE Plus

Electric industrial water heater

DRE Plus - 52/80

- Powerful electric water heater that produces large amounts of hot water in a short time
- DWH capacity from 339 to 1132 litres/hour at 50°C depending on the chosen appliance
- Capacity: 173 – 264 litres
- Because the unit has an external on/off function, you can control when to use external power supply. For example when you have supply from your PV panels
- 3 to 9 incoloy heating elements with a maximum output of 50.4 kW
- Cascade control of the heating elements allows a more even and responsive heating of the water
- All elements and thermostats are fuse-protected
- PermaGlas Ultra Coat second-generation glass coating technology helps to prevent corrosion
- The appliance can be adjusted according to DHW needs via the display, so that the appliance can function as energy-efficiently as possible
- Thanks to the enameled elements, the exchangeable magnesium anode is less stressed
- Targeted maintenance possible thanks to the display of the exact fault diagnosis on the elements

In the instruction manual you will find all the necessary information regarding connection, installation and maintenance of the product; including information on the electrical connections.

Information regarding the recycling or disposal of the product can also be found in the manual. This manual is delivered with the appliance and can also be found on our website; www.aosmithinternational.com.
